- Asterisk

Advantages

Dev Office Location

Ukraine is situated on the border between Europe and Asia, granting access to world-class premium technologies that come at an affordable price. European Quality comes in a package with the best possible pricing.

Price and Quality

A rare combination of both may barely be seen amongst various IT services providers worldwide, but we are oriented on long-term relationships with partners.

Flexibility

We offer our customers the choice of which business model they would prefer seeing applied to their project, thus granting a better grip over general project flow and budget.

Full Cycle Services

We cover the full software development life cycle from business analysis to quality assurance and deployment and post-launch maintenance. For a client, this means there is one vendor handling the job. This makes your budget and timeline more predictable.

How we work

Competitive pricing

With us you get the true value for your money. Our highly cost-effective and reliable services ensure that you receive the highest return on your investment. No hidden cost involved.

Proven Methodologies

The experience of working with a diverse client-base and latest technologies let us to use best practices and proven methodologies.

24/7 Technical Support

We are extremely customer-focused in assisting our clients 24/7. We offer highest level of technical support using world-class communication systems.
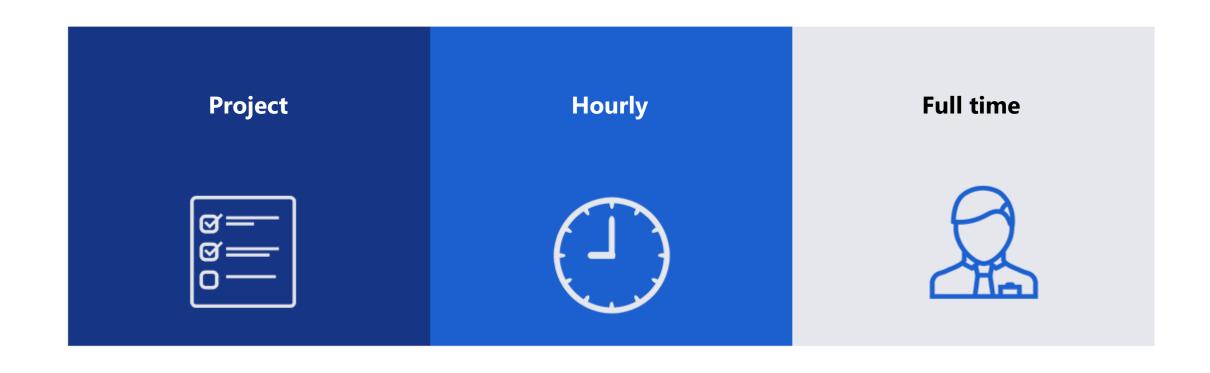

ISO 9001 Processes

The development processes implemented at The Marat Company follows ISO 9001:2008 standards that ensures high-performance execution during the entire project cycle.
